

Project title : Calculating Family Expenses Using ServiceNow

TEAM ID : LTVIP2026TMIDS52531

TEAM LEADER : R Varshitha

TEAM MEMBER : M Manasa

TEAM MEMBER : V Yeswanthi

TEAM MEMBER : K Yashwitha Reddy

CALCULATING FAMILY EXPENSES USING SERVICENOW

Aim of the project

To develop a centralized and automated platform that helps individuals or families track, manage, and optimize their expenses with ease. The goal is to promote financial discipline and simplify budget planning by using the powerful features of ServiceNow like scripting, reporting, and process automation. The project aims to develop a comprehensive expense calculation system using ServiceNow. This system will enable users to track and manage family expenses efficiently. It will include features such as expense categorization, budget setting, real-time tracking, and reporting capabilities. Utilizing ServiceNow's robust platform, the project will ensure seamless integration, user-friendly interface, and scalability to accommodate varying family sizes and financial complexities. The end goal is to empower users with the tools they need to make informed financial decisions and promote financial well-being within the family unit.

Milestone-1

Setting up servicenow instance

1. Sign up for a developer account on the ServiceNow Developer site "<https://developer.servicenow.com>".
2. Once logged in, navigate to the "Personal Developer Instance" section.
3. Click on "Request Instance" to create a new ServiceNow instance.
4. Fill out the required information and submit the request.
5. You'll receive an email with the instance details once it's ready.
6. Log in to your ServiceNow instance using the provided credentials.
7. Now you will navigate to the ServiceNow.

Milestone-2

Creation Of New Update Set

1. Go to All >> In the filter search for Local Update set > click on New.
2. Enter the Details as: Name : Family Expenses
3. Then click on Submit and Make current.

Milestone-3

Creation Of Family Expenses Table

1. Go to All > In the filter search for Tables > click on New.

2. Enter the Details: Label : Family Expenses Name : Auto-Populated New menu name : Family Expenditure
3. Go to the Header and right click there>> click on Save.

Creation of columns(fields)

4. Near Columns Double click near insert a new row.
5. Give the details as: Column label : Number Type : String
6. Double click on insert a new row again
7. Give the details as: Column label : Date Type : Date
8. Double click on insert a new row again
9. Give the details as: Column label : Amount Type : Integer
10. Double click on insert a new row again
11. Give the details as: Column label : Expense Details Type : String Max length : 800
12. Go to the Header and right click there>> click on Save.

. Making Number Field An Auto-Number

1. Double click on the Number Field/Column.
2. Go down and double click on Advanced view

Project

3. In Default Value: Use dynamic default : check the box Dynamic default value : Get Next Padded Number
4. Click on Update.

5. Go to All >> In the filter search for Number Maintenance >> select Number Maintenance

6. Click on New.
7. Enter the below Details: Table : Family Expenses Prefix : MFE
8. Click on Submit.

Project

The screenshot shows the ServiceNow configuration page for the 'Family Expenses' table. The table name is 'Family Expenses', the prefix is 'MFE', the number is '1,000', the application is 'Global', and the number of digits is '7'. There are 'Update' and 'Delete' buttons at the bottom left. Below the form, there are 'Related Links' and a 'Show Counter' link. The browser address bar shows the URL: dev277343.service-now.com/now/nav/ui/classic/params/target/sys_number.do%3Fsys_id%3D55ea6d38c392ae109102bd73e40131ec%26sysparm_record_target%3Dsys_number%26sysparm...

. Configure the form

1. Go to All >> In the filter search for Family Expenses >> Open Family Expenses
2. Click on New
3. Go to the Header and right click there>> click on Configure >> Select Form Design

The screenshot shows the 'Family Expenses - Create MFE0001006' form. The configuration menu is open, showing options like 'Form Builder', 'Form Design', 'Form Layout', 'Related Lists', 'All', 'Table', 'Security Rules', 'Business Rules', 'Client Scripts', 'UI Policies', 'Data Policies', 'UI Actions', 'Notifications', and 'Dictionary'. The form fields include 'Date' and 'Amount'. The browser address bar shows the URL: dev277343.service-now.com/now/nav/ui/classic/params/target/u_st_u_family_expenses.do%3Fsys_id%3D-1%26sys_is_list%3Dtrue%26sys_target%3Du_st_u_family_expenses%26sysparm_c...

4. Customize or Drag Drop the form as per your requirement.
5. Make Number Read-Only Field by clicking on the gear icon and checking Read-Only
6. Make Date, Amount Mandatory Field by clicking on the gear icon and checking Mandatory
7. Click on Save.

Milestone-4

Creation Of Daily Expenses Table

1. Go to All > In the filter search for Tables > click on New.
2. Enter the Details: Label : Daily Expenses Name : Auto-Populated Add Module to menu : Family Expenditure
3. Go to the Header and right click there>> click on Save.

Creation of columns(fields)

4. Near Columns Double click near insert a new row.
5. Give the details as: Column label : Number Type : String
6. Double click on insert a new row again
7. Give the details as: Column label : Date Type : Date
8. Double click on insert a new row again
9. Give the details as: Column label : Expense Type : Integer
10. Double click on insert a new row again
11. Give the details as: Column label : Family Member Name Type : Reference Max length : 800
12. Double click on insert a new row again
13. Give the details as: Column label : Comments Type : String Max length : 800
14. Go to the Header and right click there>> click on Save.

Relationship - Daily Expenses

Name: Daily Expenses

Application: Global

Applies to table: Family Expenses [u,st_u_family_expenses]

Queries from table: Daily Expenses [u_daily_expenses]

This script refines the query in current that will populate the related list. For more information about it, its parameters and control variables, see [the documentation](#). See also the article about the [recommended form of the script](#).

Query with: Turn on ECMAScript 2021 (ES12) mode

```

1 (function refineQuery(current, parent) {
2
3
4 // Add your code here, such as current.addQuery(field, value);
5
6 current.addQuery('u_date', parent.u_date);
7
8 current.query();
9
10
11 })(current, parent);

```

4. Add Daily Expenses to the Selected Area.
5. Click on Save

Milestone-7

Creation Of Business Rules

1. Go to All >> In the filter search for Business Rules.
2. Under System Definition Select Business Rules then click on New.

3. Enter the Details: Name : Family Expenses BR Table : Select Daily Expenses Check Advanced
4. In when to run Check Insert and Update

The screenshot shows the ServiceNow Business Rule configuration page for 'Family Expenses'. The 'Name' field is 'Family Expenses' and the 'Table' is 'Daily Expenses [u_daily_expenses]'. The 'Application' is set to 'Global'. The 'Active' and 'Advanced' checkboxes are checked. The 'When to run' tab is selected, showing 'When' as 'before' and 'Order' as '100'. The 'Filter Conditions' section is empty. The 'Role conditions' section is also empty. The 'Update' and 'Delete' buttons are at the bottom.

5. In Advance(we write the code): Write the below code >> (function executeRule(current, previous /*null when async*/) { var FamilyExpenses = new GlideRecord('u_family_expenses'); FamilyExpenses.addQuery('u_date',current.u_date); FamilyExpenses.query(); if(FamilyExpenses.next()) { FamilyExpenses.u_amount += current.u_expense; FamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-"; FamilyExpenses.update(); } else { var NewFamilyExpenses = new GlideRecord('u_family_expenses'); NewFamilyExpenses.u_date = current.u_date; NewFamilyExpenses.u_amount = current.u_expense; NewFamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-"; NewFamilyExpenses.insert(); } })(current, previous);
6. Go to the Header and right click there>> click on Save.

The screenshot shows the ServiceNow Business Rule configuration page for 'Family Expenses' with the 'Advanced' tab selected. The 'Condition' field is empty. The 'Script' section contains the following code:

```

1 (function executeRule(current, previous /*null when async*/) {
2
3
4 var FamilyExpenses = new GlideRecord('u_family_expenses');
5
6 FamilyExpenses.addQuery('u_date',current.u_date);
7
8 FamilyExpenses.query();
9
10 if(FamilyExpenses.next())
11 {
12
13 FamilyExpenses.u_amount += current.u_expense;
14
15 FamilyExpenses.u_expense_details += ">" + current.u_comments + ":" + "Rs." + current.u_expense + "/-";
16
17 FamilyExpenses.update();
18
19

```

Milestone-8

Configure The Relationship

1. Go to All >> In the filter search for Relationships >> Open Relationships.
2. In that, open Daily Expenses Relationship.
3. For Applies to table : Select Family Expenses.
4. In Query with : write the below Query. (function refineQuery(current, parent) { // Add your code here, such as current.addQuery(field, value); current.addQuery('u_date',parent.u_date); current.query(); })(current, parent);

5. Click on Update.

Conclusion

In conclusion, implementing the "Calculation of Family Expenses Using ServiceNow" project offers numerous benefits to the household. By leveraging the robust capabilities of ServiceNow, family members can efficiently submit, track, and manage their expenses in a centralized and streamlined manner.
